

# **Saratov Fall Meeting 2011**

## **Special session on BC memory**

Yu Chen\*

Fischell Department of Bioengineering  
University of Maryland, College Park, MD, USA

\*PhD Student with BC from 1997-2003

---

## YU CHEN:

---

“I was fortunate to study under BC for my PhD. BC was a great mentor. Under his guidance, I entered the exciting field of biomedical optics. His teaching was solid and comprehensive, and he always tried his best to provide the needed resource for his students. Working with BC opened the wonderland of research to me, and I began to enjoy the excitement of new discovery and inventions.”

May 2003, University of Pennsylvania

## YU CHEN:

---

“Sailing with BC was also full of fun and thrills. No matter the weather was good and bad, he can always steel the boat steadily and bring us to the destination. His spirit will always encourage us to overcome the difficulties in our lives.”
